Subject: New Features made live in e-NAM Application and provision of non e-NAM trade data on e-NAM portal –reg.

Sir/Madam,

I am directed to inform you that 6 new features have been added on eNAM portal (**Annexure 1**). These features will help the users and stakeholders to improvise the usage of the software and speed up the transactions. These features have been made live on 3/5/2019 and can also be viewed on *What's New* sections on <http://enam.gov.in>. We are advising Strategic Partner (NFCL)'s State coordinators who will be conducting a demo session for yourself and the Mandi executives to update on usage of the same.

Further for capturing Non eNAM Trade Data on e-NAM portal, the format is also being sent with the letter which has been made live on eNAM portal on 15th November 2018, steps for non e-NAM Trade data entry capturing of lot-wise e-NAM and non e-NAM Trade electronically would have the following advantages for the Mandis and State Agriculture Marketing Board (**Annexure 2**)

- No dependency on Physical Auction Register (Physical Record Keeping)
- Real-time information of Total trade in the Mandi.
- Trade Analysis/ Business Intelligence based on data uploaded.

Accordingly you may advise all the e-NAM Mandis in your jurisdiction to upload non e-NAM trade data on a regular basis.

Thanking you,

Yours faithfully,

आवक क्र:-1949

Enclosures: As stated above.

15/3

Annexure 1: New Features - eNAM

e-NAM Shopping cart

e-NAM Shopping Cart is a way to create a temporary list of Lots by adding them to cart. Lots can be added for bidding purpose that will make bidding process convenient and also trader can bid in bulk as per their selection/choice.

Discounts to Traders at the time of e-Payment

To promote online payments on e-NAM, various state governments had come up with discounts on digital transactions. To avail this facility, application administrator can configure desired discount percentages in the application. On selection of e-Payment mode by buyer, configured discount facilities will be automatically applicable in the transaction. This discount in Mandi fee will be applicable only in e-Payments.

Logistic Information Module

e-NAM portal provides module for Logistics service providers to create their profile and upload data such as:

Name/Address/Contact, Annual Turnover, Vehicle Type, Rates per Km, and Region of service etc. Further this feature would help service seekers also to allow them to rate the services also in future.

Bunching of multiple invoices

This trader friendly feature will reduce multiple transaction cost by bunching of selected invoices for single payment purpose. This feature is applicable for Inter-mandi and interstate Invoices also. Single transaction will reduce multiple transaction time for traders.

Auto Sale Agreement

Auto sale agreement will reduce e-NAM workflow execution time and reduce Farmer's transaction waiting time. After weighment is done, auto sale agreement feature will generate Sale agreements.

Unified trading licensing system for Inter State

Trader can apply for interstate trade permission through their e-NAM login. On approval of request by respective State / APMC administrator, trader can participate in trade for both the states simultaneously. State/APMC administrator can track such interstate request and further trade by the trader.

Annexure 2: Non eNAM Trade Entry on e-NAM platform

Objectives:

- Capturing of non eNAM Trade on e-NAM platform
- Non eNAM Trade refers to all the trade within the Mandi which are not practiced through e-NAM platform (Offline mode)

Benefits:

- No dependence on Physical Auction Register (Physical Record Keeping)
- Real-time information of Total trade in the Mandi
- Trade Analysis/ Business Intelligence (Files exported to MS Excel)

Step by Step Guide for non eNAM Trade Entry

Step 1:

Login to e-NAM platform through Mandi Credentials

Step 2:

In the Entry Exit Tab, click on Non eNAM Trade Entry

The screenshot displays the e-NAM platform interface. At the top, there are navigation tabs: Administration, Lot Operations, and Auction. Below these, there are sub-tabs: Masters, Transactions, and Reports. The Reports sub-tab is active, showing a list of reports. The 'Non eNAM Trade Entry' option is highlighted in the list. The main content area shows a table with columns for Quantity and No. of Lots. The table is currently empty. The date is 20/11/2018. The interface also shows a 'Refresh' button and a 'Home and Alerts' button.

Quantity	No. of Lots
----------	-------------

Commodity	Unit	Quantity (Today's Lot)	Quantity (Previous Lot)	Trade Value (Today's Lot)	Trade Value (Previous Lot)
-----------	------	------------------------	-------------------------	---------------------------	----------------------------

Step 3:

Select Date, enter Commodity, Quantity (in Qnt), Trade Value and Seller Name
Rate (Rs. Per Quintal) would be automatically calculated

Administration ▾ Entry Exit ▾ Lot Operations ▾ Auction ▾

Now eNAM Trade Entry/Exit

* SELECT DATE TO ENTER THE TRADE VALUES 13/11/2018

View ▾ Add Delete Select

Commodity	Quantity in Quintal	Trade Value	Rate(Rs. per Quint)	Seller Name
CHILLER	Q	5	32125	64220 VENKAT

New Modify Save Print Reset Close

Step 4:

Click on Save to capture non eNAM trade

Click on Add, to add details of other lots traded outside e-NAM
