म0प्र0 राज्य कृषि विपणन बोर्ड
भोपाल।

D.O. No. 26011/2/2016-M.II (Vol.II)

Dear Sir,

As you may be aware that e-NAM has been awarded prestigious The Hindu BusinessLine: Change Maker- Digital Transformation Award 2019 recently. I avail of this opportunity to thank you and all officials/ Stakeholders for their continuous collective engagement and contribution to e-NAM, which has resulted in bringing-up e-NAM as a change maker.

2. As Rabi harvest season is fast approaching, I request you to review the performance of e-NAM mandis of your State both in terms of infrastructure and operational readiness and to take timely necessary steps in advance so that all the arrival in e-NAM mandis are e-traded through e-NAM portal to make it a grand success in its true spirit. Accordingly we request you to review preparedness in terms of the following:-

i. During peak harvest season, long queue of trucks/ tractors/ hand cart/ farmers had been observed in the past at the gate entry of concerned APMCs. For this we have been continuously advising to increase the no. of computers, data entry operators at gate entry and also requested to provide alternatively handheld devices/ tablets/ mobile phones to facilitate gate entry. Already the facility of autofilling of registered farmers details is also provisioned. This department had already launched feature such as "advance lot registration for commodity trade" facility, whereby concerned farmer can do advance lot registration of commodity before his arrival at entry gate through his e-NAM mobile app. to reduce queue at gate entry, which will bring huge efficiency and facilitate smooth arrival recording at gate. However, it is observed that the advanced lot registration facility has not been popularized by you with farmers resulting in non-use.

ii. Review the mandi-wise infrastructure along with manpower to operate the same, as it has been observed that necessary infrastructure for e-NAM operations, including computers, dedicated Internet Leased Line connectivity, electronic weighing scales required to weight produce after bidding etc are not sufficiently available in the identified mandis. Further such electronic weighing scales which are required to be integrated to e-NAM platform by mandi have not happened in your State. Use of dongles/ broadband facility instead of dedicated Leased Line in many e-NAM mandis in the State is causing problem. Mandi wise infrastructure analysis is enclosed as Annexure-I. There is also need to provide few dedicated e-NAM auction platform with facility for electronic weighing to promote e-trade in the e-NAM mandis.

आवक क्र :- 46(A)

दिनांक :- 9/4/19

iii. It is requested to provide time efficient assaying equipments for assaying of agri. produce & skilled manpower in all e-NAM mandis of your State & also ensure sufficient mandi level capacity for quality assaying labs in each mandi. ~~Already assaying parameters to facilitate trading in e-NAM platform in 124 commodities have been provided. To build up confidence among the traders for assaying, this Department had launched in recent past additional features related to assaying like 360 degree image capturing of the commodity heap through e-NAM mobile app., assayer can upload 2/3 2D image of Laboratory with equipment and also upload 2D image of commodity sampling process for the lot for better confidence of trader on e-NAM.~~

iv. In respect of no. of bids received per lot, it has been observed that average bid received per lot during Feb, 2019 is only 4.8, thereby lacking competitive bidding. This is contrary to the spirit of price discovery & providing remunerative prices to the farmers due to escaping of competitive bidding on e-trading platform. Further you may also consider incentivising the Farmers/ traders who carry out transactions through e-NAM portal and particularly those who carry out regularly as encouragement to them. This Department already made a provision on the request of few States in this regard in the software whereby discount to traders on market fee at the time of e-payment is provided.

v. e-NAM is strongly aligned to Digital India and has a provision for an online payment gateway for direct payment to farmers. This department had already provided facility to make online payment on mobile app and portal using BHIM (UPI) apart from internet payment and debit card based payment etc. and needs your active promotion in the interest of farmers. It is also requested to collect the correct database (Account number, bank details etc.) for all stakeholders like Farmers, traders & commission agents.

3. I am also enclosing the copies of market-wise status of infrastructure & average bid per lot report to analyse the performance of each mandi.

4. ✓ You may be happy to know that following features had been provided in recent past (which are repeated here), in order to popularize e-NAM amongst various stakeholders, you must promote these new user friendly mobile app. features like:

- a) e-NAM shopping cart facility, e-NAM Shopping Cart is a way to create a temporary list of Lots by adding them to cart. All Lots from different mandis can be added for bidding purpose by traders thus simplifying multiple bidding in multiple markets. This will increase convenience in bidding process and trader can bid efficiently in multiple markets and in different commodities with ease as per their selection/choice.
- b) Bunching of multiple invoices for single payment purpose. This will reduce multiple transaction cost and reduce multiple transaction time for traders.
- c) Auto sale agreement will reduce e-NAM workflow execution time and farmers' transaction waiting time and bring more transparency into the system.
- d) Logistic information module is also created where a logistic provider will registered themselves in e-NAM portal to post the information, auto sale agreement unified trading licensing system to promote inter State trade.

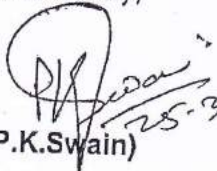

5. In order to popularise e-NAM amongst farmers, it is essential that e-NAM mandi functionaries to constantly organise meetings at various Gram Sabhas in their jurisdiction for explaining the benefits of e-NAM as well as to educate farmers on use of mobile app. Similarly "Farmer Facilitation Counter" should be set up by each e-NAM mandi to explain and train the farmers on e-NAM mobile app.. In addition to this, "e-NAM Mitra" (well trained in e-NAM) should be made available at entry gate to provide assistance/ guide farmers on e-NAM trading facility in the mandi.

6. I also request you to kindly on board the potential FPOs/ FPCs on e-NAM platform on mission mode and encourage them to sale their produce on e-NAM platform starting with current Rabi harvest season.

A line of reply will be highly appreciated.

With regards,

Yours sincerely,

(P.K. Swain) 25-3
